Now I must say I'm a bit partial because I realized while reading it that we share similar views on a lot of things. I even bought 2 other books of his immediately after starting this one (and LOVED them just the same!) but either way he explains things very thoroughly in an eclectic mix of psychological science and philosophical theory! And the way he ties everything together! It's really good. I bought this book in pretty good condition for 1 cent which is great, but also kinda sad because it just goes to show how much intellectual genius is undervalued these days! But it's a great book and I highly recommend it for cerebral people.
